Introduction

My goal is to establish a career in the Software Development industry, which I am very passionate about. I was first introduced to C Programming and micro-processor programming during my time studying electrical engineering at Ara Institute of technology.

I am an eager to learn, newcomer to the industry. I have continued to develop my coding skills and extend them through continual self-learning via online programming algorithm practice using codewars.com and video courses though LinkedIn learning, while also learning as I went through making software projects.

During my time working in the civil construction industry as a site traffic management supervisor I developed strong time management, communication, and independent work ethic skills. As I am a quick learner, I progressed from the entry level traffic controller to the highest-level qualification in a very short period of time.

I have proven performance while working under pressure to hit strict deadlines for clients and while reacting to emergency situations. able to remain focused at the end of 14-hour shifts.

Education and Training

- **Bachelor of Engineering Technology** - **Major: Electrical 1 year completed**

Ara Institute of Canterbury

- **Site Traffic Management Supervisor Level 2/3 practicing**
- **NCEA Level 3 -** Taihape Area School

Technical Skills

Languages
- Python
- PHP
- C
- C#
- JavaScript
- SQL database
- MATLAB
- CSS
- HTML

Tools
- Visual Studio Code
- Visual Studio
- Wing IDE
- Git
- GitHub
- Azure DevOps

Methodologies
- Agile
- Object orientated Programming

Frameworks
- ASP.Net Core MVC
- React
- Xamarin.Forms

Key Strengths and Attributes

- **Computer software --** Able to learn new computer software effectively and quickly. various software projects including, games, websites, chat bot's and automation.
- **Read and understand documentation --** using the code of practice for temporary traffic management provided by NZTA to ensure the site is safe and legal. site checks and record keeping. detailing all site changes for future reference
- **Time management --** respond to emergency situations and quickly find solutions to client problems, finding the most efficient way of doing the task at hand
- **Effective communication and interpersonal skills --** discussions with clients to ensure the best possible outcome. Able to communicate with contractors, Site Engineers and Project Managers to coordinate the traffic management with the construction tasks and crews on site. discussions with clients to ensure the best possible outcome.
- **Leadership --** lead work crews, delegated tasks, trained new staff, set targets,
- **Negotiating --** negotiated pay rates for seasonal workers at Fairview orchard.
- **Independent work --** able to be left unsupervised to set and achieve targets and deadlines and resolve issues without supervision
- **Training new people --** experienced in teaching new staff.
- **Customer Service Skills --** Strong customer service ethic.

Education and Training

2018	**Site Traffic Management Supervisor Level 2/3 practicing**
2018	**Site Traffic Management Supervisor Level 2/3 Non-practicing**
2017	**Site Traffic Management Supervisor level 1**
2015	**Traffic Control Course**
2015	**Bachelor of Engineering Technology - Major: Electrical 1 year completed**
	Ara Institute of Canterbury
2009 – 2012	NCEA Level 1 with Merit
	NCEA Level 2 with Merit
	NCEA Level 3

Employment History

Citycare Group - Site Traffic Management Supervisor (STMS) - 2015 to 2019
- **18 Months Full-time level ⅔ Practicing STMS --** in charge of large projects, supervising crew, discussing with clients, leading other STMS, emergency response, second in-command night shift manager, night shift operations manager for 1-month, and training other STMS.

- **6 months Full-time level ⅔ Non-Practicing STMS --** working on larger projects, training staff, conducting audits on lower level site, and training other STMS.

- **3 months Full-time level 1 STMS --** leading small projects, leading staff, working with enable for fibre rollout discussing with client for best outcomes.

- **3 months Part-time level 1 STMS --** supervising low level work sites, training new staff on low level roads, supervising staff.

- **12 Months Part-time Traffic Controller --** setting up site, basic labour tasks.

Countdown - night fill - March 2015 to October 2015
- Customer service, unloading boxes onto shelves, organization of stock.

McDonalds - Crew Member - 1 year (Part-time)
